As an educator, you will be able to:

- Understand the **process of creating visual stories**
- Understand how to **help students** respond to new information through posts, videos or webpages
- Confidently create with **Adobe Spark Post, Spark Page** or **Spark Video**
- Learn how **creative storytelling projects** can benefit your teaching and your students' learning

Adobe Spark

© Mahfuzah Mohamad | mahfuzah.weebly.com

Your **students** will be able to:

- Create visual stories - **graphics, presentations and videos** - to support any project
- **Engage** with and respond to content in any discipline by creating visuals such as posts, videos or webpages
- **Communicate** with impact and tell stories with text, images, video and more
- **Increase their career opportunities** in any industry

Adobe Spark

01

Getting started with Adobe Spark

Adobe Spark is a powerful and free tool that you can use to quickly and easily create professional-looking digital graphics, webpages and videos for the classroom and beyond. Spark is simple to use and allows anyone to foster powerful learning experiences and create engaging digital content to support any project.

FAQ

Can I collaborate on mobile?

- Not yet: You'll have to be on spark.adobe.com on your desktop or laptop to invite collaborators. On mobile, collaborative projects will become disabled to avoid introducing conflicts.

Can we edit at the same time?

- We are working on it, but right now our collaboration is a tag-team system: only one person can edit an Adobe Spark project at the same time to avoid conflicts. We'll let you know who is editing the project so you can ping your friend to let you make your changes.

Can a recipient publish?

- If you are a recipient of a project, you'll be able to download a project or grab a link to an already-published project, but only the owner can publish or update a link.

Spark in the Classroom

About the Course | Instructors

Share

"Stories will stay with people much longer than facts or statistics. If a teacher becomes an excellent storyteller, he or she can ensure that any concept they teach will be remembered for years to come." - teachthought.com

Help your students communicate with impact

In this course, you will learn to help your students analyze, and create powerful stories, as well as present new information with clarity and ease. When students need to make science fair posters, social studies infographics, journals, language arts essays, lab reports, physics explainers or poetry analysis, Adobe Spark can help. With Adobe Spark, Post and Video, students are able to quickly and easily present information in professional, catchy and creative ways.

By teaching your students how to tell their own creative visual stories, or to respond to what they learn with images and videos, you're giving them valuable digital skills and helping them to develop vital communication skills applicable to any industry.

Engage your students with essential creative and digital skills

Teaching students to use digital tools to present information in creative ways - whether in a research presentation or a personal narrative - helps them to engage more deeply in their learning. It's never been easier to encourage creativity and capture the imagination of your students. Using Spark Post, Page and Video introduces students to a variety of digital skills they may otherwise not learn until much later in their lives. As Spark is so easy to use, it's a perfect introduction to digital literacy and essential creative thinking skills.

Everything in this course, from video tutorials to lesson plans and resources, is perfect for assigning directly to your students. Or, if you prefer, you could even use our materials as inspiration to create your own lesson plans and projects that speak directly to your students.

Develop your own essential creative and digital skills

02 Create

Give students the autonomy

Give students a chance to interact with the content

Allow them to focus on the things they find most interesting and engaging

Student learn to create new things

Create fun, engaging & fully interactive presentation

New knowledge is gained & applied

Make students feel confident & comfortable

Design | Express | Build | Choose | Customize | Decorate

© Mahfuzah Mohamad | mahfuzah.weebly.com

When students learn the effective use of visuals - i.e. learning to consume and to create them - they tend to have an improved understanding of what they are expected to learn. Similarly, research also shows that thinking creatively helps students to actively engage with learning content and more readily retain information.

© Mahfuzah Mohamad | mahfuzah.weebly.com

03 Collaborate

Recognize team members strengths & weaknesses

Working together to complete their mission/goal

Giving credit to others for contributions

A willingness to find solutions to problem

Actively listening to other team members concern

Comment | Like | Help | Share | Contribute | Communicate

© Mahfuzah Mohamad | mahfuzah.weebly.com

Share with you

DID ADOBE SPARK HELP YOU TO CREATE CREATIVE CONTENT? SHARE YOUR EXPERIENCES...

Mentimeter

Yes

adobe spark is one of the best for the website creater. it is easy to user and very user friendly. the most important thing while using this web creation application is free to used by everyone and user dooes

It provides an easy way to create the one-page website. It is usability and understandability.

It's much easier and amaze me by the features. It helps me to be more creative by insert pictures.

For me, Adobe Spark really give me a new experience on setup slide for the presentation. It makes my group slide became interactive. Plus this adobe also easy to handling.

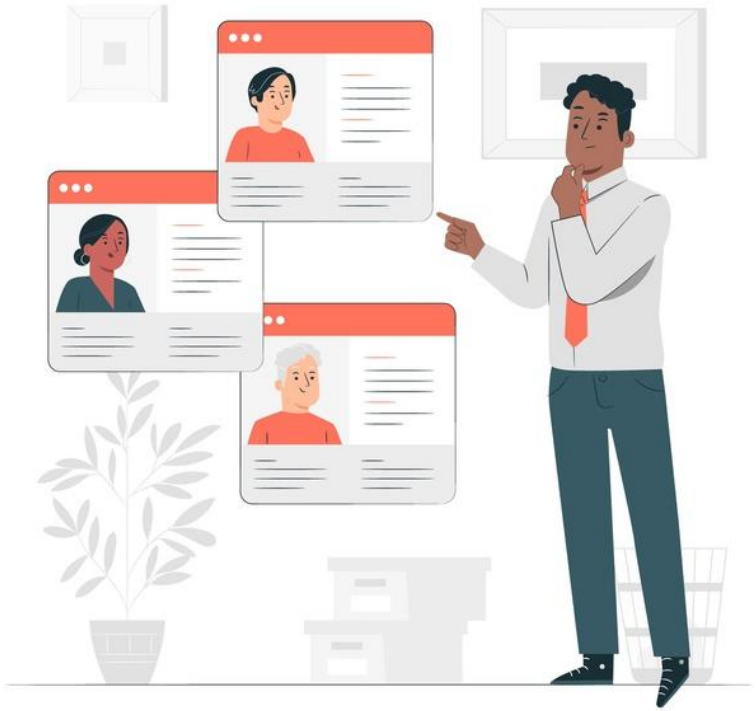
yes because it helps me to

06 Share

Exchanging knowledge which can contribute to new opportunities for future collaboration.

Create Online Learning Communities

Assign social buddies



Knowledge sharing gives online learners the ability to share ideas, ask questions, and address concerns.

Start sharing once learners have begun communicating to learn from each other's discoveries and experiences

As a result, they are more motivated to participate and actively engage

Communicate | Teach Others | Create Opportunities | Create New Offering

Are you ready to
SPARK creativity?
Adobe Spark Professional Development Toolkit
https://spark.adobe.com/page/xZe7r6crvPb6h/
https://www.adobe.com/education/express/

Spark makes it easy to foster powerful creative learning experiences.

Improves project-based learning and outcomes.

Studies have shown the value of creativity in the classroom, the hiring process, and the workforce — and 82% of professionals wish they'd had more exposure to creative thinking as students.

Incredibly easy to use.

Everything's included — templates, fonts, music, and an amazing variety of photos. You'll get guidance along the way to develop instant design superpowers and build creative confidence.

Right in your browser.

Spark is made for the web, so students can create stories from any browser on any device, including Chromebooks. The apps are also available on iOS and Android.

Built with privacy and safety in mind.

Spark offers safe search for images and videos. In addition, it can be used in accordance with COPPA and similar EU laws if you obtain parent consent. Learn more.

Spark works with your favorite classroom tools.

Google Drive · Google Classroom · canvas · Flipgrid · Microsoft Teams · OneNote

Students are more engaged in learning when they can present their work visually

With Adobe Spark Page, you can take creative storytelling one step further by collating various media - including your Post and Video creations - into a flexible, shareable learning resource.

Adobe Spark Page also helps to motivate your students by transforming text-based projects, like essays and reports, into stunning web resources that are beautiful, adaptable and fun. Using Spark Page, your students will be able to create field trip journals, language arts essays, lab reports and more as dynamic web stories.

Interactive storytelling

https://www.youtube.com/watch?v=PXMrrBnPTpw

© Mahfuzah Mohamad | mahfuzah.weebly.com

Mahfuzah Mohamad
22 January ·

One day project presentation with my students...

For this semester, I'm teaching a multimedia subject... Students learn about editing tools (photoshop, illustrator), video editor (premiere, rush, spark video, Filmora, etc), presentation tool (sway, spark page), and the last part is to do an animation project using Animate.

Because of Prof Abd Karim Alias conduct a webinar session about Storytelling & my Ph.D. (Mogana) student also study the same topic... so I decide that the Theme for the final project this semester is "Interactive Story"

Interactive story writing is a new medium for creative expression...The state of the art is that the story (plot, character behaviors, character interactions, conversations, etc.) is specified by writing scripts. In other words, this technique uses animation, video, music, images, and other multimedia to compile a narrative.

The process is started with setting up a team member (4-5) and assign their roles... who will act as Project Manager/Director, Graphic Designer, Script Writer, Multimedia Programmer, etc... and then follow the Interactive Story Making Process:

Analysis Phase:
a. Select a topic
b. Identify your audience, character, plot, etc
c. Start writing/Script

Design Phase
a. Create a storyboard
b. Find resources and related contents
c. Design character, background, etc

Development Phase
a. Record your narration
b. Editing - Putting it all together (Animate)
c. Publish & Share

Documentation
a. Report (Canva, Sway, Genially, Spark, etc)

In the end, you can rate based on:
1) Choice of topic.
2) Storyline
3) Visual aspects
4) Sound/Narrator
5) Length
6) Creativity

I share with you one of the projects (will share the other project one by one later)... with the name of the project "THE PROUDLY BIRD". Here is documentation submit & present by the student:
https://spark.adobe.com/page/u4RmHaMpWwYJx/

The final output you can get it here:

https://htslegacyenterprise.h5p.com/.../1291226388971110569

Overall, really proud of the final output this semester because my 1st year students just see me on screen 😍

Credit to my students: Rafieuddin, Chiou Xiang Ooi, Athallah Ariq , Azizi, and Badrul Azhar.

For this reason, visual storytelling is a key skill that any educator can use to communicate with impact, and teaching your students to tell their own visual stories or present new information in creative ways is a fantastic way to get them engaged, motivated and inspired in any topic or discipline.

Captivating Videos

Adobe Spark can be a great tool for students to use to **create videos** about books they've read, people they've studied, or highlights of a school event. The new collaboration option will empower students to work together to make videos about **shared experiences** like a field trip or to showcase the fruits of a group research effort.

With the rise of flipped, blended and online learning, students and teachers increasingly use video and online content as a core part of their learning resources.

Students are more motivated to learn when they create with video. Video is a popular and engaging medium for telling visual stories and sharing information - it's immediate and fun, and has the potential to enrich your curriculum and help your students dive deeply into learning any topic.

Using Spark Video, your students will be able to quickly and easily turn book reports, physics explainers, poetry analysis and more into video presentations, then use the integrated creative tools to customize their learning.

Dear SITI NURUL MAHFUZAH MOHAMAD,

Daniela Nikolaeva has added the following new comment on your assignment titled DIY Social Media Graphic Design.

Hello Siti,

This looks like a great class! I liked your promo a lot. One tiny thing I noticed was that slides changed a bit fast for me to ab able to read. Nevertheless, I enjoyed your Spark video

In the age of the mobile phone, creating video has never been so quick and easy, so let's get started.

Adobe Spark Video is every bit as powerful as Post, and allows you to enliven boring presentations and create inspiring educational stories.
