- **The free account has a few limitations**
  - Standard video quality instead of high definition
  - The PowToon branding (watermark and outro) will appear at the end of each video
  - There are limited styles available
  - The maximum duration for each PowToon is 5 minutes
  - PowToons cannot be downloaded to your computer
- **Can use templates or make from scratch**
  - I recommend using a template for your first Powtoon
- **Can import your own images**
  - Saved on your computer or from a URL
- **Powtoon Basics**
  - *Stage*
  - *Slide Panel*
    - Add/Remove slides
    - Changing the order of slides
    - Duplicates the slide that is selected
    - Clone object button
      - Only copies the last object to the next slide for a smooth transition from one slide to the next, but only for 1 second long
    - PowToon has two modes: movie and presentation.
      - Presentation – activates the “hold” button so you can add “stops” to the animation for talking
        - Presentation mode allows you to pause the clip and divide it into sections (slides). The clip will stop wherever you put a "holder" and will only resume playing when you press play, making it ideal for presentations. However, the holders are not recognized outside of the PowToon website, therefore these clips can only be played with PowToon's player (on the PowToon site).
        - If they are downloaded, they will play in a movie mode (continuous play).
    - Movie – continuously plays

- *Menu Panel*
  - Share
    - Loads the preview page - Includes a URL for you to share or post

- Export

- *Library Panel*
  - Styles
    - Objects/Props change according to the style you choose
    - Most styles free – some require an upgraded account
- *Timeline*
  - Default timeline is 10 seconds
  - Maximum time per slide is 20 seconds
  - Each object has its own duration bar
    - The entrance & exit effect is on each specific objects duration bar AND
    - Listed under the play button
  - Thumbnails for each object are listed below the timeline
  - Flip object button to reverse its position
